

Junior Technology Associate

LifeCanvas Technologies is an MIT startup developing cutting-edge technologies and platform that reshape biological tissue studies with the mission of expediting breakthrough discoveries in science and medicine to improve human health.

As a **Junior Technology Associate**, you will work closely with our senior engineers and scientist to lead and ensure continued optimization of our tissue processing and imaging product pipeline. With your technical expertise, you will streamline the manufacturing processes, manage quality control for domestic and international orders and contribute to the scaling of our Contract Research Organization (CRO) business and Microscope Division. You will also be responsible for providing comprehensive on-site and remote training & technical support for our end users. Travel will be required from time to time (~30%).

There will be ample opportunities to be promoted to a senior role based on your performance. You will also be working with world-class researchers in Bioengineering, Drug Discovery, Oncology and Neuroscience across the nation and beyond in both academia and industry.

Our ideal candidate will have:

- Bachelor's degree in Biomedical Engineering, Mechanical Engineering, Electrical Engineering, Chemical Engineering or related technical field
- Prior experience in a lab designing experiments and protocols
- Prior experience in fast-growing life sciences startup or environment a plus
- Prior experience in managing product lifecycle or taking a prototype out of a lab to commercialization a plus
- Any imaging experience a plus

Characteristics we are looking for:

- You're full of energy, adaptability, grit, and sincerity
- You are solution-oriented; your job often entails solving a problem and providing a solution
- You communicate with clarity and keep the team in sync
- You are all about follow-through and delivery
- You have a 'no task too small' attitude and top-notch work ethic
- You are able to work under tight deadlines with exceptional attention to details
- You want your work to have a big, positive impact in this world

Why LifeCanvas Tech?

- Impact millions of people's health by developing and disseminating revolutionary tools to expedite discoveries in science and medicine
- Collaborative, positive, and proactive culture with the mantra to improve the status quo
- Fast and dynamic environment to grow and lead
- Have fun making your ideas become products and services
- Work with the brightest minds
- Health benefits, 401K setup, Lunch Wednesdays, Fully-stocked kitchen
